Mid-Market and Enterprise Homepage Single Service

The Car Service search feature appear as a seperate finger or tab on this homepage.

Notes: Perhaps a title is need such as schedule a ride. This looks a little broken, updating this experience should probably done with the homepage refresh or the travel refresh project.

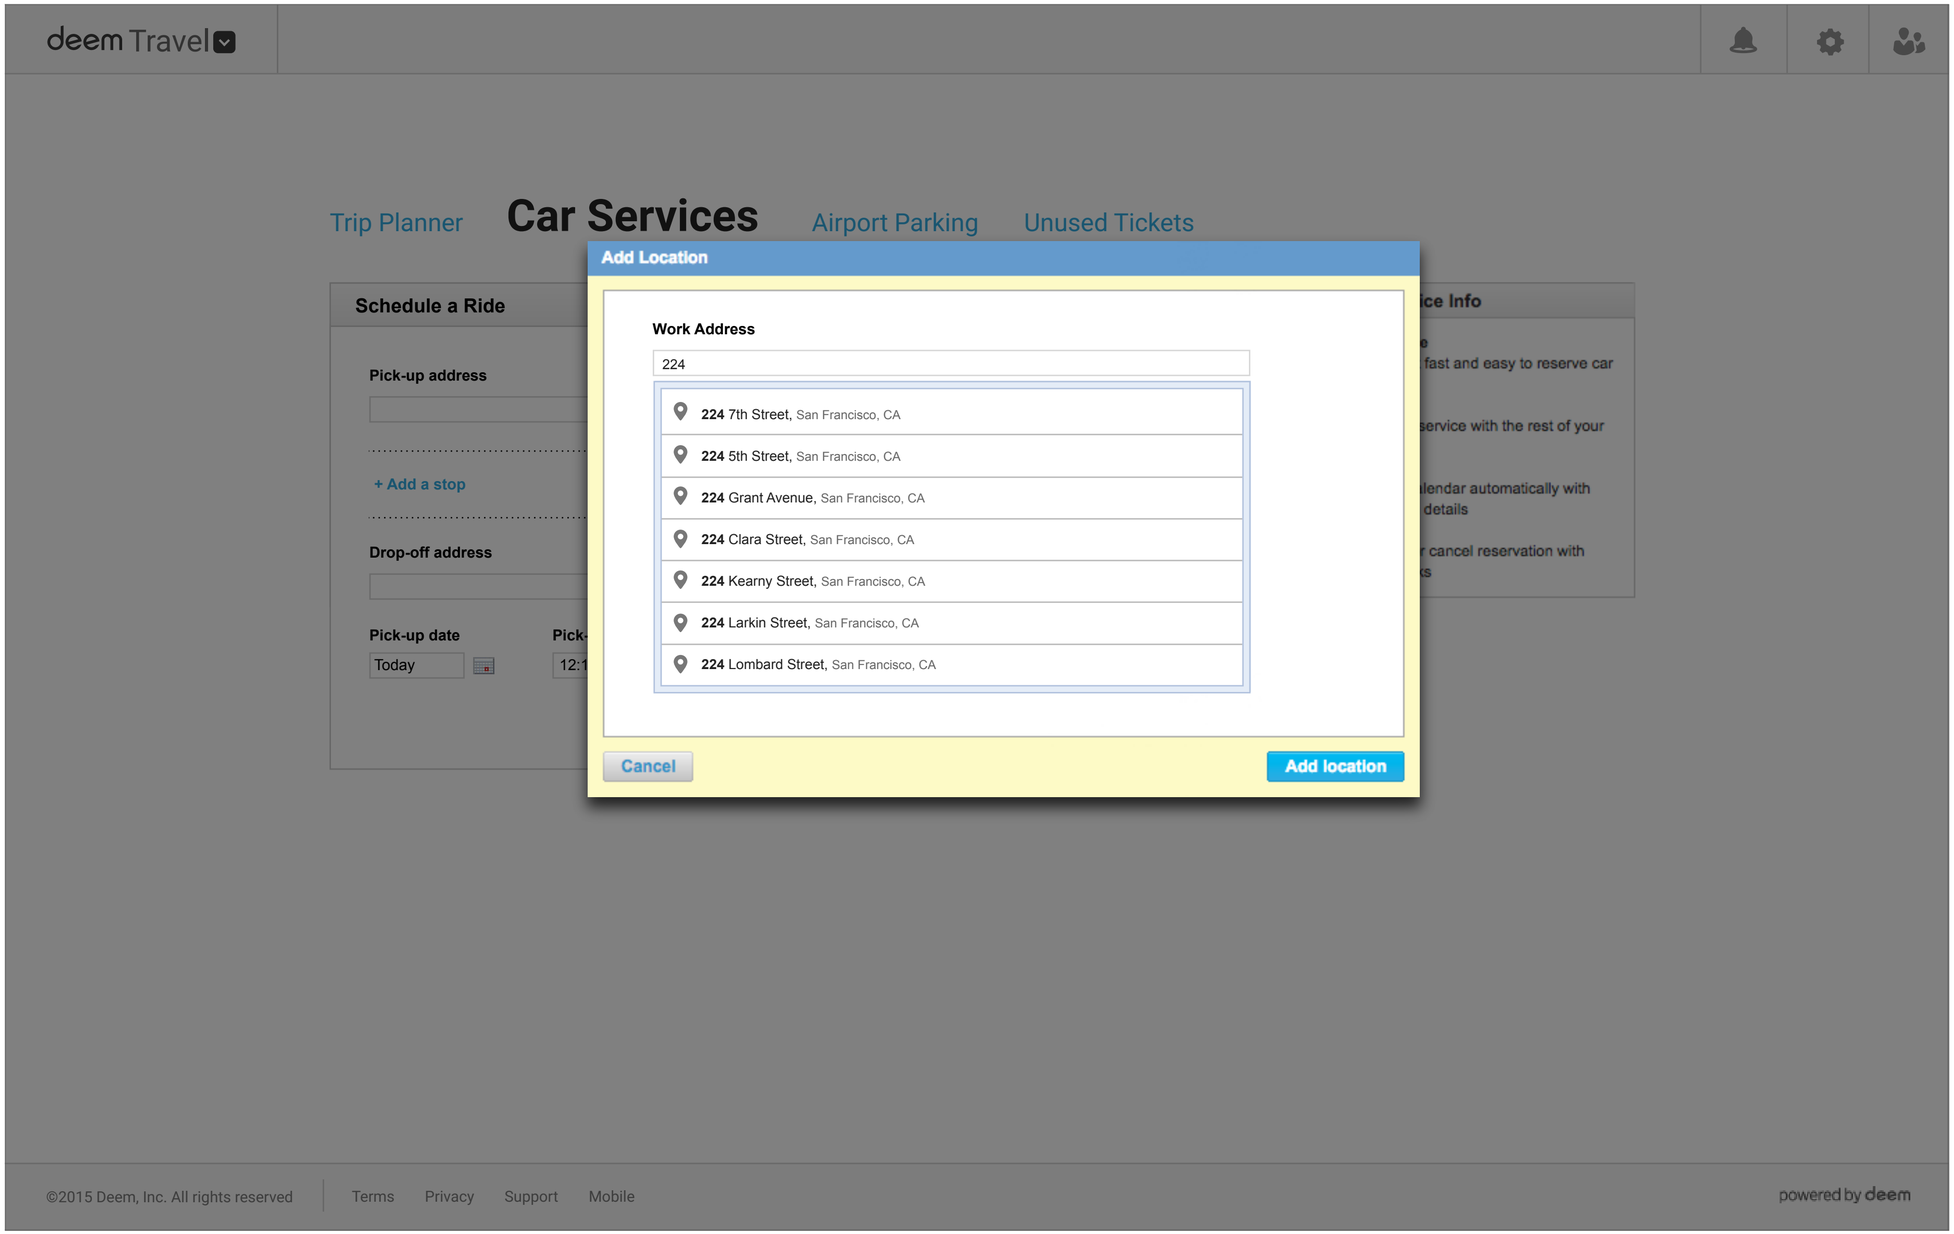
Adding an Address

A customer would like to add their work or home address.



Add a Location via Modal

Customers should be able to label and enter in their desired address.

Notes: We can possibly reduce the number of fields here. In addition we might have to lock down the location name to be work or home for 1.6, I think exploring and defining the address book might have to be a seperate project.

Error States need to be defined here. Should we allow inline errors here.

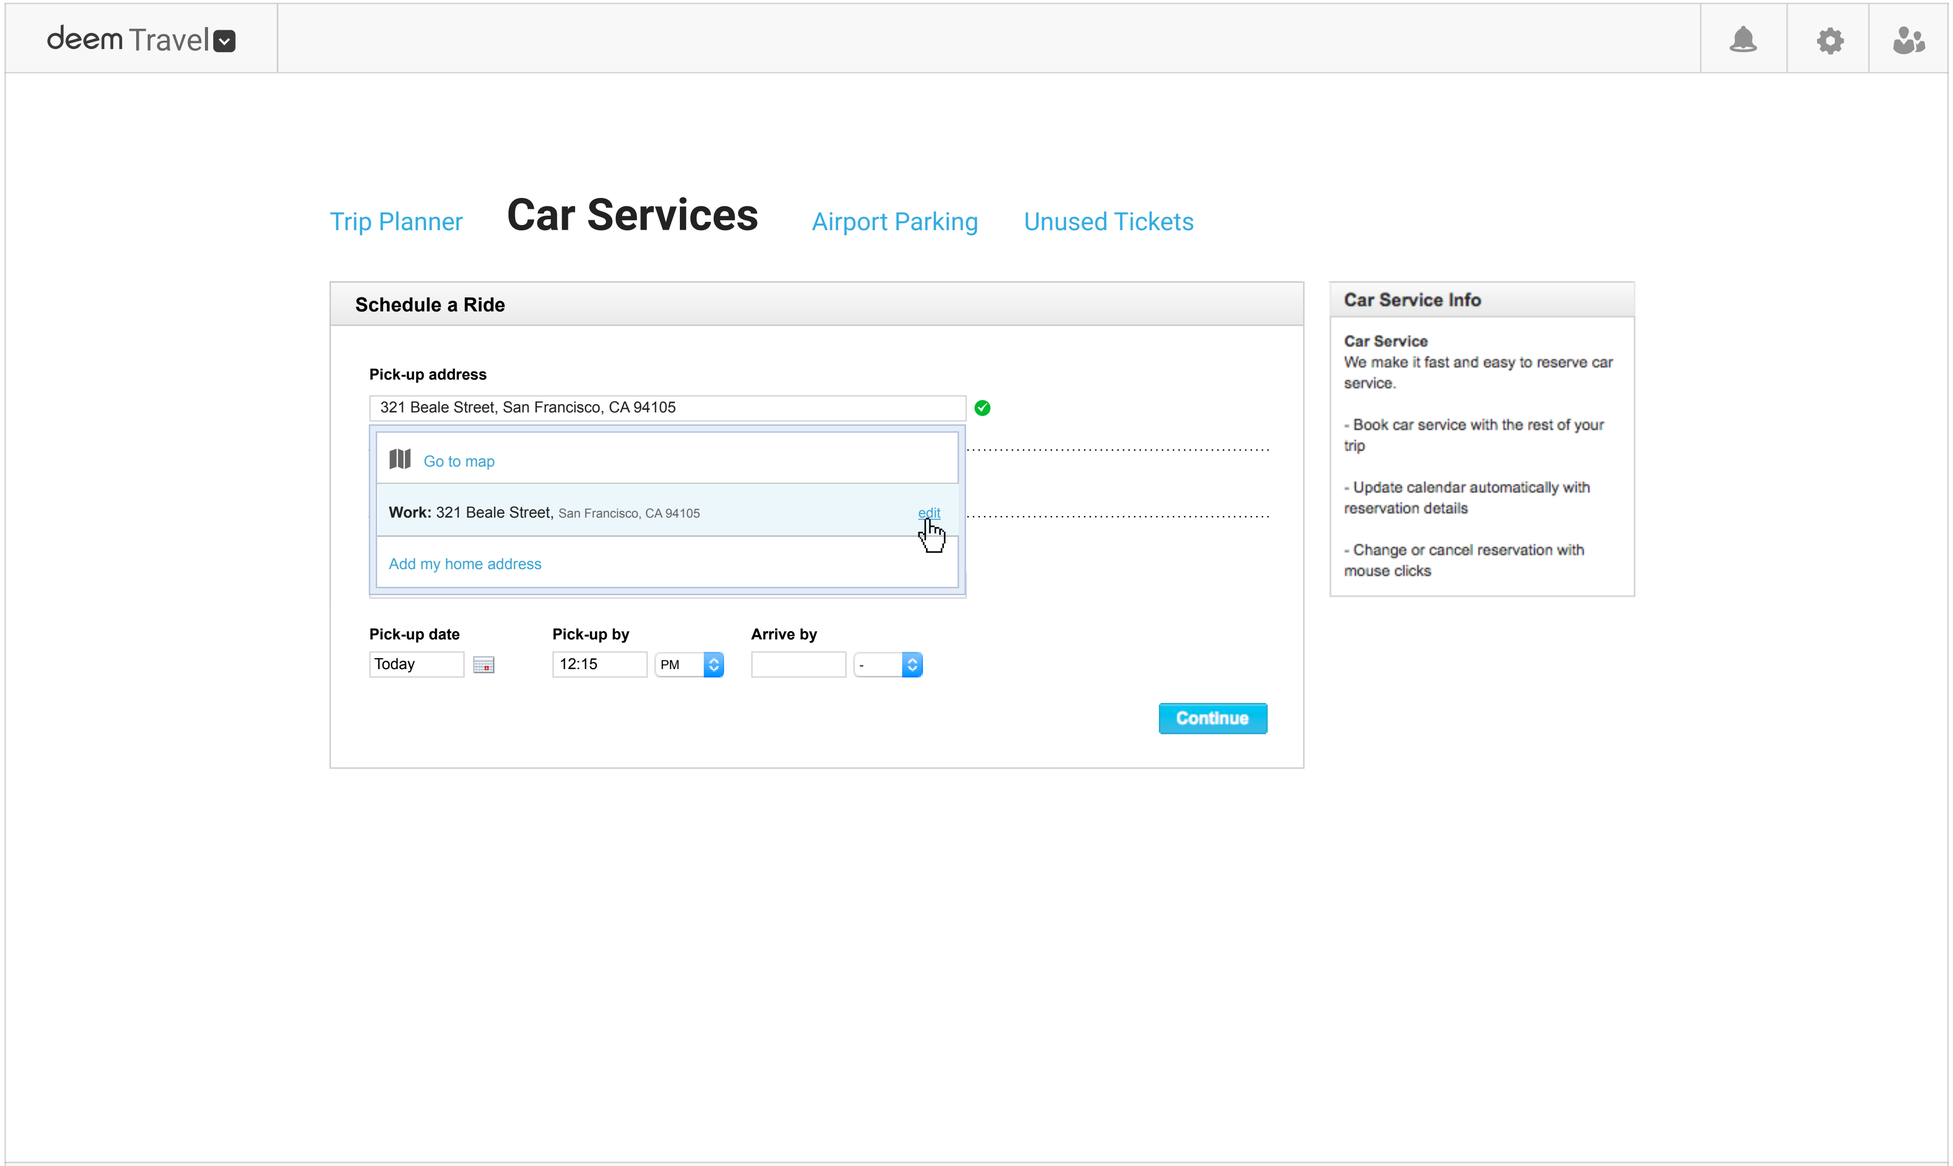
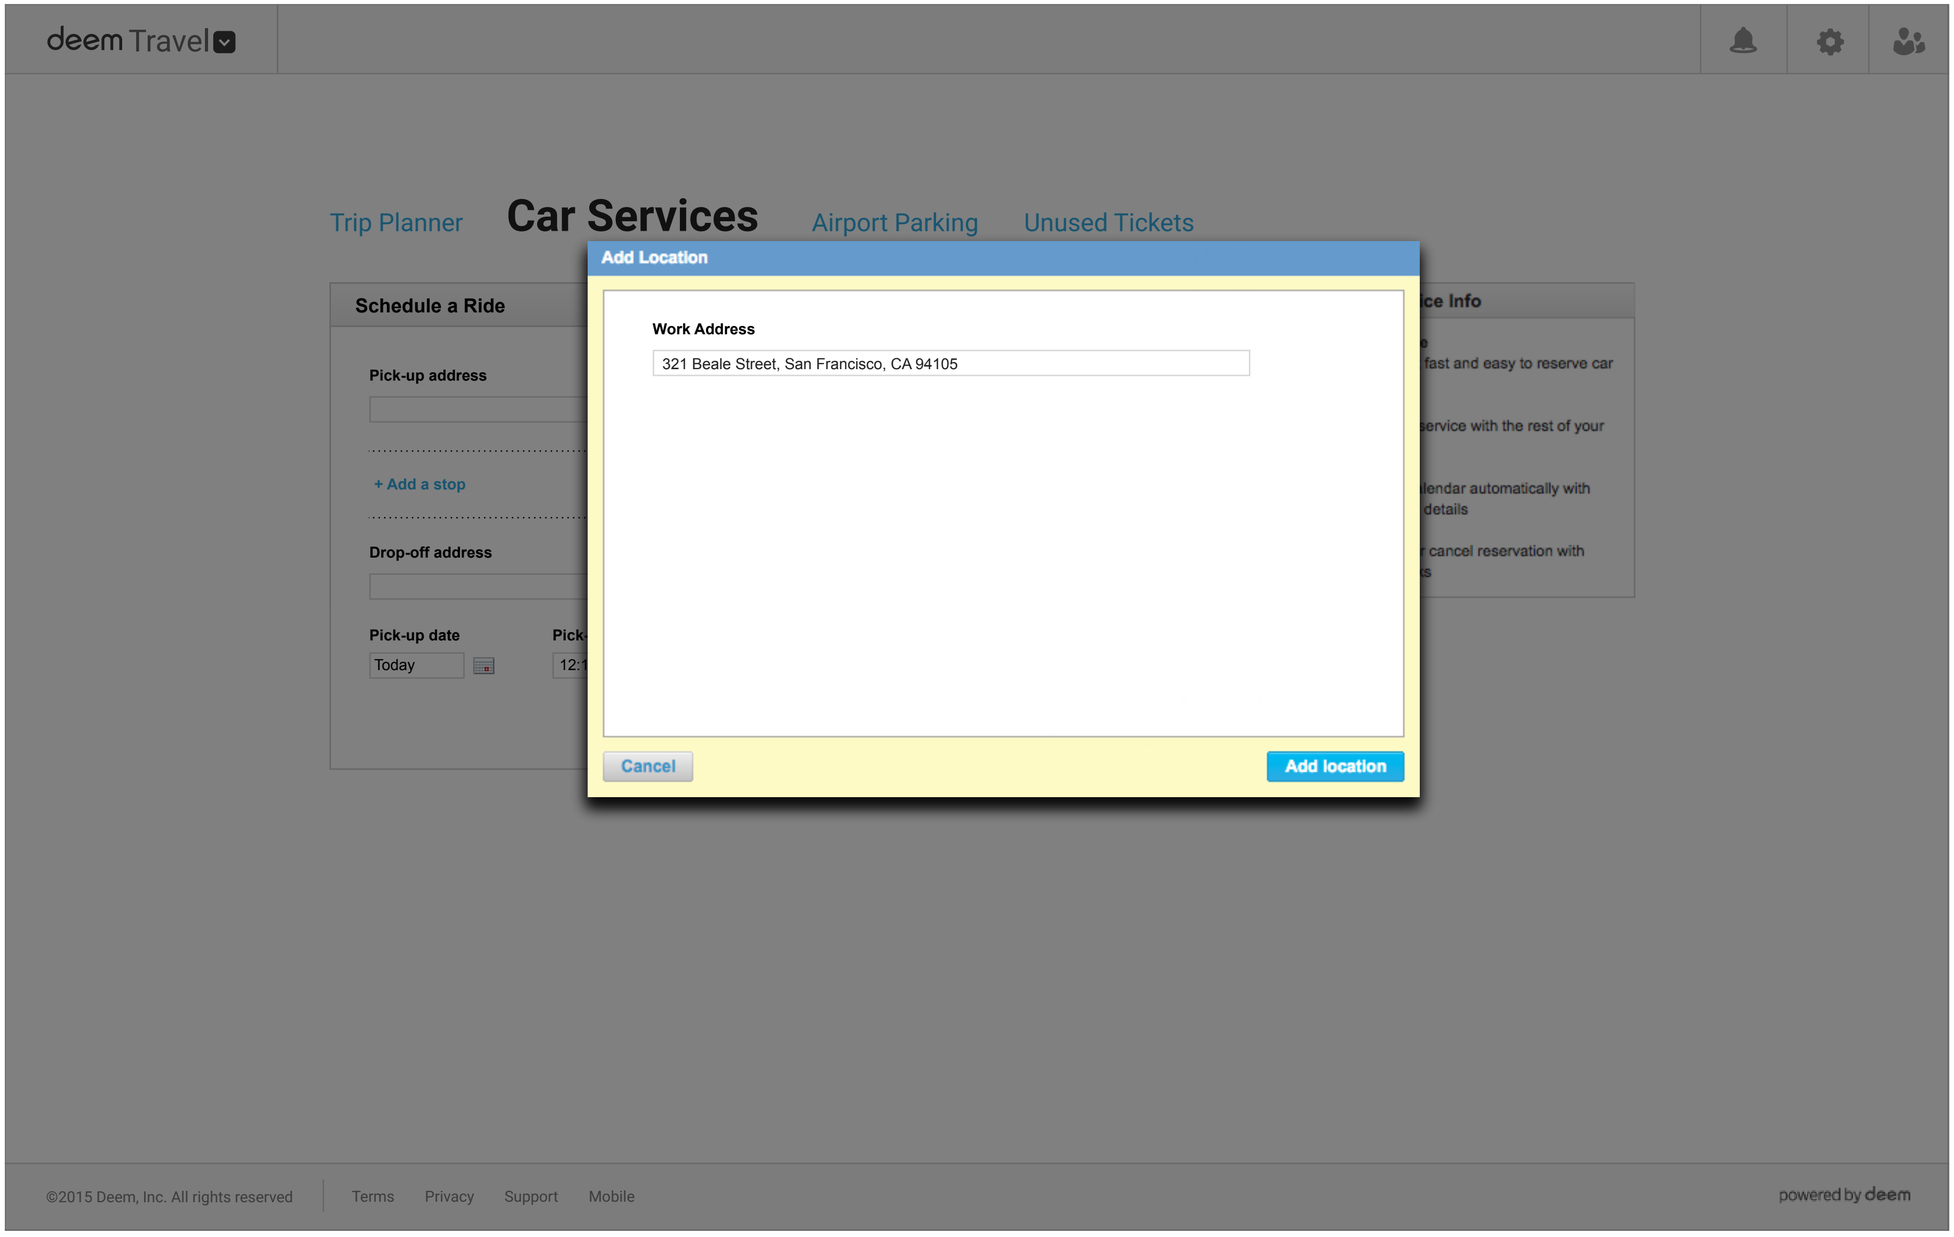
Adding an Address for the First Time

When a customer adds and address for the first time, once the address is entered into the modal and added, the modal transition back to the car services search field along with newly inputed address being displayed.



Editing an Address

Editing an address can also be achieved, by selecting edit UI in the type ahead. This should trigger the edit modal.



Edit via Modal

Customers should be able to edit thier address via the modal. Once edits have been made it should auto fill the search form.
