# Software/Internet Companies

## iCharts for Business

iCharts is a leading Business Intelligence and Analytics solution for NetSuite. Transform your NetSuite data into interactive, real-time analytics without leaving your NetSuite dashboard. Complete with drag-and-drop chart creation and best-practice templates, iCharts accelerates your organization's analytics strategy by empowering your team with the critical data-driven tools they need.

Provider: iCharts

Version: 2016-2

First Available: 12/1/2016

Compatible with:

Languages: English

Video: [Play](#)

**OVERVIEW** FEATURES PROVIDER REVIEWS

### Real-Time Visual Reporting

iCharts' patented cloud technology allows you to group data and visualize it on your NetSuite dashboard, all without the need to export, invest in middleware, or embark on a lengthy implementation process. Your data can stay within NetSuite where it's secure and up to date.

### Key Benefits

- **Automate the Busywork:** iCharts updates your reports automatically, so you can stop building the same report every week. Free up time to do work, not build reports.
- **Get Everyone on the Same Page:** Standardize your reporting and give your entire team access to a single source of truth that's always up to date with the latest information.
- **Learn More from Your NetSuite Data:** iCharts turns NetSuite into a powerful BI tool, so you can move beyond basic KPIs and start discovering deeper insights. Take NetSuite's analytics to the next level.
