Search Errors

No connectivity should be leverage from the platform messaging
(Use the offline modal)

Cant validate address

- Get a list of possibilities for all validate address. Use the modal.
(map select)
- Inline, Errors.
- Check with travel what happens when i put in a bad aircode.

Date validations

- OMG are you from the future?!? (no going back in time)
- Whoa too close to travel time.
- Theres no way your gonna make that time.
- Arrival constrainst
- Define warnings and errors interactions.

Airline failures

- Need to have a screen for flight errors (is it a modal? we need 2 options move ahead or redo)

No Results

- Complete Emptyness (Zen riddle?)
- Sedan no results encourage the next tab or a tab that has content
- Whats the MVP for the empty data set?

Pending Request and failures

Confirmation page, oops we failed, or someone else booked do over?

Can we see some of the perishable content errors.

We have existing patterns in the mobile travel UX, these could handle the perishable failures error states. Lets review the current pattern.
